

zplane.development Announce e´lastiqueAAXtce

zplane.development announce e´lastiqueAAXtce, e´lastiqueAAXtce is zplane’s time manipulation algorithm designed exclusively for Pro Tools.

Some time ago zplane announced elastiqueAAX (see image above), a fully featured version of their class-leading time and pitch stretching software for Pro Tools. Now zplane has announced a stripped-down version of the elastique time-stretching algorithm for use as the default time stretching engine right inside Pro Tools for use with the built-in TCE tool.

e´lastiqueAAXtce uses the e´lastiquePro V3 time-stretching engine which is integrated into many DAWs and used by millions of users around the world. e´lastiquePro V3 technology ensures the highest, program independent time-stretching quality.

e´lastiqueAAXtce offers multi-channel support for synchronous time stretching of up to 8 audio channels.

Feature at a Glance

- e´lastiqueAAXtce delivers the versatile, award-winning e´lastiquePro V3 time-stretching engine to Pro Tools.
- Offers unmatched quality to meet the demands of professional productions and broadcast applications.
- Makes stretching artifacts obsolete, providing sharp transients and crystal clear vocals without phasing artifacts.
- Offers stable timing, inter-channel phase coherence and sample accurate stretching
- Up to eight channels
- Time stretching 25% - 400%
- Just choose it as your preferred algorithm in Pro Tools and take your audio to a new level

Minimum system requirements: OSX 10.7 (and higher) Windows 7, 8 & 10

zplane elastiqueAAXtce will sell for €149 with an Avid Store exclusive introductory offer for tce version of €99 more information at <http://www.avid.com/plugins/elastiqueaaxtce> from May 15th 2018 for 30 days. zplane also announce an immediate price reduction for the elastiqueAAX full plug-in version down from €399 to €299.
