

Waves Announces FLEX Rent-to-Own Plugins

Waves Audio, a leading provider of audio processing solutions, announces FLEX, a rent-to-own Waves plugins plan.

With Waves FLEX, musicians, engineers and producers can now experience a flexible, affordable, simple and easy entry point into the industry's largest selection of renowned professional tools and choose precisely the plugins they need, without having to pay extra funds for tools they may not be interested in acquiring. Users can pick 10 plugins of their choice, out of a vast and diverse assortment of 85 award-winning plugins. As an introductory offer, the user will be entitled to receive a time-limited bonus consisting of an extra three free plugins of their choice, from the 85 plugins on offer.

As opposed to other known subscription plans, Waves' FLEX allows the user, at the end of a 24-month period, to own the plugins they have been renting.

In addition, FLEX owners receive full coverage of the Waves Update Plan (WUP), free of charge during the time they are on the FLEX program, and they will receive an extra one year, free of charge, when they have completed the two-year FLEX plan. This grants Waves users complete support for their Waves plugins, including plugin updates, tech support and more.

Waves' FLEX rent-to-own costs \$19.99 a month. Users can cancel their rental plan at any time.
