

NUGEN Audio new music production and post-production bundles

Modern tools for today's production environments developer NUGEN Audio announce its new website (www.nugenaudio.com) with the launch of six new bundles — Focus, Modern Mastering, NUGEN Producer, Loudness Toolkit, NUGEN Post, and Surround Suite — specifically designed to deliver their respective proprietary algorithms in inspiring, workflow-enhancing combinations for music and post-production engineers, as of June 20...

In total, there are three new bundles aimed at music production: Focus features three award-winning plug-ins, proffering precise stereo positioning (Stereoplacer), reliable, full-frequency stereo widening and enhancement (Stereoizer), and essential bass management (Monofilter); Modern Mastering makes mastering with confidence and precision in today's world of digital consumption through music streaming services an effortless experience, thanks to three perfectly positioned plug-ins, including an intelligent look-ahead brick-wall limiter that provides highly-transparent True Peak limiting (ISL), a streaming service auditioning and metering toolset (MasterCheck), and comprehensive audio analysis utility (Visualizer); NUGEN Producer delivers deeper control over full production workflow with eight plug-ins, including the previously-mentioned MasterCheck Pro, Monofilter, Stereoizer, and Stereoplacer, and Visualizer bolstered by a mono and stereo audio production version of ISL (ISL st), a modular signal modification utility plug-in (SigMod), and a linear phase spline 'Match & Morph' EQ for mono and stereo audio production (SEQ-ST).

Similarly, there are three new bundles aimed at post-production: Loudness Toolkit is the leading workstation solution for loudness compliant delivery with three products working in concert to deliver unsurpassed quality and workflow efficiency, comprising an automatic, quick-fix compliance plug-in (LM-Correct — now updated to include the DynApt dynamics extension) and an industry-standard loudness metering plug-in/standalone application (VisLM) alongside the aforesaid intelligent look-ahead brick-wall limiter (ISL); NUGEN Post is an uncompromising collection of 11 plug-ins for high-quality broadcast, film, and game audio production, including the previously-mentioned ISL, LM-Correct, Monofilter, SigMod, Stereoplacer, Stereoizer, VisLM, and Visualizer bolstered by a precise downmixing and surround rebalancing tool (Halo Downmix) and a stereo to 5.1, 7.1 and 3D upmixer (Halo Upmix) alongside a linear phase spline

'Match & Morph' EQ (SEQ-S); Surround Suite comprises four previously-mentioned plug-ins — Halo Downmix, Halo Upmix, ISL, and SEQ-S — to upmix, downmix, create, hone, and reshape the sound of its user(s) for mono, stereo, and surround audio.

The Focus, Modern Mastering, NUGEN Producer, Loudness Toolkit, Nugen Post, and Surround Suite bundles are available to purchase directly from NUGEN Audio for \$199.00 USD, \$299.00 USD, \$499.00 USD, \$899.00 USD, \$899.00 USD, and \$1,499.00 USD, respectively.
