

Dorico SE: Free Music Notation Software

Steinberg today announced the availability of Dorico SE, an introductory version of its advanced music notation software, that is completely free to download and use. It is the ideal starting point for beginning composers and arrangers, and is fully compatible with the other products in the Dorico family.

Dorico is widely acknowledged as the innovative leader in music notation software, and Dorico SE allows every musician, whatever their budget, access to the same powerful tools used by professionals worldwide in the fields of music for film and TV, concert music, musical theatre, and music publishing.

Dorico SE brings a number of unique capabilities to free music notation software for the first time, particularly in the area of sound and playback, including:

- Sequencer-style Play mode, complete with piano roll editor, velocity editor, automation lanes for MIDI controllers, and a unique new dynamics lane that allows tweaking of the playback effect of dynamic markings written in the score.
- Support for all VST 3 instrument and effect plug-ins, in addition to the included HALion Sonic SE 3 sampler with more than 1,000 production-ready sounds, and a suite of 30 effects plug-ins.
- A full audio Mixer, with sends and inserts for effects, and a global effects channel.
- The same award-winning, high-precision audio engine found in Steinberg's

- leading digital audio workstation, Cubase.
- Easy export of audio files in MP3 and WAV format.
