

Universal Audio Releases Apollo Solo Audio Interfaces for Mac and Windows

Apollo Solo delivers class-leading Apollo conversion with dual Unison™ mic preamps and Realtime UAD Processing over Thunderbolt 3 or USB

Universal Audio, a manufacturer of professional audio recording hardware and software, is proud to release Apollo Solo - a reimagined line of portable desktop audio interfaces for Mac and Windows users. With class-leading audio conversion, dual Unison-enabled mic preamps, and Realtime UAD Processing, Apollo Solo is where world-class recording starts.

Exclusive to Apollo audio interfaces, Unison technology gives Apollo Solo and Apollo Solo USB's mic preamps the exact impedance characteristics and unique gain stage "sweet spots" of the world's most sought-after tube and solid state preamps, guitar amps, and stompboxes, including genuine emulations from Neve, API, Avalon, SSL, Manley, and more.*

Apollo Solo

Apollo Solo offers class-leading A/D and D/A conversion with Realtime UAD SOLO Core processing, letting users track and mix with a full library of UAD Powered Plug-Ins with near-

zero latency. Apollo Solo's Thunderbolt 3 connectivity gives both Mac and Windows† users a powerful and portable bus-powered desktop recording solution.

Apollo Solo includes LUNA Recording System (macOS only), UA's groundbreaking music production application that gives Apollo owners the fastest recording environment for music production, editing, and mixing.

Apollo Solo - Key Features

- Desktop 2x4 Thunderbolt 3-powered audio interface for Mac and Windows with class-leading 24-bit/192 kHz audio conversion
- Unison mic preamp and guitar amp emulations from Neve, API, Manley, Marshall, Fender, and more*
- Realtime UAD Processing allows near-zero latency tracking with classic UAD plug-in effects, regardless of software buffer setting
- Includes studio compressors, EQs, reverbs, and guitar amp emulations, and more as part of "Realtime Analog Classics" bundle
- Best-in-class headphone amplifier for loud, detailed, low-noise monitoring
- Bus-powered connection to Mac and Windows Thunderbolt 3 computers for easy portability and reduced cable clutter
- Includes LUNA Recording System - a fully-integrated recording application made for Apollo (Mac Thunderbolt only)

Apollo Solo USB

Apollo Solo USB brings UA's industry-leading introductory audio interface to the Windows USB platform. Featuring the same class-leading Apollo A/D and D/A conversion and onboard Realtime UAD plug-in processing, Apollo Solo USB offers Windows compatibility via USB 3 (USB Type-C connection), utilizing an external power supply.

Apollo Solo USB - Key Features

- Desktop 2x4 USB 3 audio interface for Windows 10 with class-leading 24-bit/192 kHz audio conversion

Universal Audio Releases Apollo Solo Audio Interfaces

Wednesday, 12 August 2020 10:37

- Unison mic preamp and guitar amp emulations from Neve, API, Manley, Marshall, Fender, and more*
- Realtime UAD Processing allows near-zero latency tracking with classic UAD plug-in effects, regardless of software buffer setting
- Includes studio compressors, EQs, reverbs, and guitar amp emulations, and more as part of “Realtime Analog Classics” bundle
- Best-in-class headphone amplifier for loud, detailed, low-noise monitoring

†Apollo Solo requires a Thunderbolt 3-equipped Mac or Windows computer and is not backward compatible with earlier versions of Thunderbolt.

*Apollo Solo includes the “Realtime Analog Classics” UAD plug-in bundle. Other UAD plug-ins sold separately.
