

Zoom unveils the new Am7 microphone for Android devices

The Am7 is the perfect audio-for-video companion for your Android device. Ideal for music videos, video podcasts, vlogging and more, the Am7 makes your videos sound as good as they look.

Choose either a 90° standard stereo, 120° for a wider sonic image, or Mid-Side for a custom stereo image.

The Am7 mic position can be rotated to align with your camera to capture audio while recording video. When recording only audio, rotate the mic to the audio position, and point your phone like a mic to the sound you want to record.

The Am7 can also shoot in selfie mode, allowing you to be in the center of the action.

Adjust your input level, with a large front-facing MIC gain knob and LED level meters. Use the headphone jack for monitoring your audio before, during, and after recording.

Available on Google Play, the Zoom Handy Recorder App allows you to record, edit, and share audio from your Android. Upload your creations directly to Soundcloud** or Google Drive.

*Zoom Handy Recorder App required.

**SoundCloud App required.

Technical Specifications

- Microphone Type: Mid-side (M-S) stereo mic (90°/120°/M-S)
- Maximum input sound pressure: 120 dBspl
- Input gain: +3 - +43 dB
- Audio quality: 44.1 kHz/16 bit, 48 kHz/16 bit
- Power: Powered by connected device
- Connectors:
 - USB Type-C connector
 - Stereo mini jack
 - (combined headphone/line level output)
- Dimensions: 54.5 (W) x 57.2 (D) X 26.5 (H) mm
- Weight: 31.8 g
