Thomann Keys & Frequencies

In March 2019, the world's top YouTubers in the Synthesizer field gathered together in Treppendorf for a very successful event: #TSR19 – Thomann's Synth Reactor. This year, we needed to improvise and organised an event that is equally social, dynamic and exciting but fully ONLINE. The good thing about this: it's live, it's interactive and it's free to attend for all of you! The Keys & Frequencies event is designed to offer a live platform to anyone interested in synthesizers and related topics, where you can get together, talk shop, connect and forge long-lasting and mutually-beneficial relationships.

The carefully-curated event will be hosted by Thomann and several leading Brands, such as Korg, Nord and Moog, just to name a few, and will feature some of the synth & electronic world's most exciting Artists & Creators including Cuckoo, Look Mum No Computer and BoBeats. Get ready for new product presentations, performances, talks, workshops and more.

Program online for Thomann Keys & Frequencies

Thursday, 25 March 2021 07:00
