

Magic Dice - New Free Plugin From BABY Audio

Spaced Out Textures On Demand

Magic Dice is the successor to BABY Audio's popular Magic Switch freebie (which has over 100,000 downloads). It puts the entire sonic palette of their award-winning Spaced Out plugin into a simple one-button interface, allowing users to generate random, lush atmospheres at the click of a button.

The new freebie offers the same rich and modern reverb/delay/modulation sound as its big brother, just without the ability to tweak individual parameters.

Magic Dice generates entirely new wet-fx textures with every click and allows users to set the mix balance to taste. It will generate anything from hazy space echoes over lush reverbs to alien-sounding modulation effects. Sometimes all at once.

Keep rolling the dice until you find something you like. The combinations are endless and you'll never hear the same result twice.

Highlights

- Randomly generates lush reverb/delay/modulation textures at the click of a button
- Powered by BABY Audio's award-winning Spaced Out plugin
- Successor to the Magic Switch freebie*

* Magic Switch will still remain available for download.
