

LEaT con 24 Insights Program Ready to Book

The anticipation for LEaT con 24, 22 to 24 October 2024, Messe Hamburg, is growing: The workshops of the Insights program are now available for booking. All Insights ticket holders have the opportunity to take part in exclusive and practice-oriented sessions that offer in-depth insights into current industry trends and technologies. Due to the limited number of participants per offer, early booking is required to secure a spot.

The Insights Ticket for LEaT con 24 offers visitors the opportunity to take their experience at the trade fair to a new level. With exclusive access to selected training sessions and expert workshops, which take place in small groups, an intensive and individual learning experience is guaranteed. Participants can put together their own program and choose from a variety of offerings, ranging from practical “hands-on” workshops to in-depth “deep dives”. The guided tours of Hamburg's technical highlights are a particular attraction. In addition, the Insights Ticket includes the Basic Ticket for the LEaT X 25, which allows exchange and networking to continue beyond the LEaT con.

The ticket is available in different variants, so visitors can choose between two to five educational offers depending on the duration of their visit to the trade fair to

get the most out of their visit. This year's Insights program includes a variety of exciting topics. Of particular note are the workshops “ Simulation von Beschallungsanlagen” by Prof. Dr.-Ing. Anselm Goertz for audio professionals and the basic course “ Einführung in den Milan Manager”, which teaches the basics of using Milan Manager, a free software for managing Milan networks.

Highlights from the Deep Dives - sessions lasting 90 to 120 minutes - include an in-depth look at Managed Dante (in English) and a skills update for Companion for advanced users. Important considerations such as color temperature, light quality and the decisive parameters of RGB LEDs will be addressed together with the participants in the Deep Dive Workshop on “ Farbmischung für RGB-LED-Beleuchtungsanwendungen”.

The Tech Trips, which can also only be booked with an Insights ticket, offer a trip into the city of Hamburg. Here, for example, you can go behind the scenes of the immersive Port des Lumières exhibition, which has not yet opened. And of course, last year's very popular tour of the Elbphilharmonie concert hall is not to be missed. Further information on the individual Insights offers and their content can be found on the website below. Secure a ticket for LEaT con 24 now and experience three days full of innovation, networking and know-how at the Hamburg Messe.
