

Bogren Digital MLC S_Zero 93

Dimmu Borgir is among the originators of symphonic black metal, and the MLC S_Zero 93 is guitarist Silenoz's signature amp. Today, Bogren Digital releases its new plug-in, which closely simulates the MLC S_Zero 93 and includes numerous tools to shape and sculpt the guitar sound.

The MLC S_Zero 93 is the ultimate toolbox for creating majestic, gnarly, and

extreme guitar tones. Brimming with features and based on MLC's hand-built boutique tube amplifier, this plugin suite is explicitly designed for connoisseurs of organic and immense high-gain guitar sounds with ultimate clarity and definition. Contrast brutality with a crystal clear clean channel that offers a perfect platform for ambient and creative effects. Engineered by producer Jens Bogren in collaboration with Silenoz of Dimmu Borgir, the MLC S_Zero 93 plug-in is an unstoppable wall of chaos and beauty.

- Designed for organic and immense high-gain guitar sounds with the clarity and definition you can only get from a well-designed boutique tube amplifier
- Balance darkness with ethereal light, chime, and sparkle from the bespoke clean channel
- Make your guitar parts larger than life with the included Fascination Street Octave - a brand-new dual-octave pedal with intelligent pitch detection
- Use the four different clipping modes of the MLC Brown Sugar overdrive pedal
- Push the amp with OVD-2, a new take on Jens Bogren's favorite overdrive pedal
- Add delays and reverbs with the included high-quality pedals, specifically designed for guitars
- Switchable power amp section - 6L6 or KT88 power amp tubes
- IRDX technology adds realistic speaker cab dynamics - standard in all our amp sims

The MLC S_Zero 93 plug-in costs \$99 and is available immediately from Bogren Digital's webshop and authorized dealers.
