

Tone2 Icarus 3.1

Tone2 Audio has updated their synthesizer-workstation Icarus to version 3.1. The update is available for free for all Icarus 3 customers.

New Features:

- MPE support for Legato and Mono modes.
- Added support for custom skins.
- 'Load Sample' and 'Load Waveform' in the wavetable editor remember the last file location.

Enhancements:

- Pitchwheel snaps less aggressively to 50%.
- The new default skin makes it easier to see the structure of the synth. You can change back to the old one in SETUP->Select skin.
- Many small enhancements.

Fixes:

- Workaround for a bug of Windows 11 that messed up the vertical layout of the SeggoeUI font.
- Fix for a very rare compatibility problem with trackpads on the Mac.

Tone2 releases Icarus 3.1

Donnerstag, 05. Juni 2025 09:20

Icarus 3.1 is downward compatible with all previous versions. All existing song projects and patches can be loaded without any further steps necessary.
