AIR Music Launches 7 New Virtual Instruments

Award wining Virtual Instrument development company, AIR Music Technology and Audio Software Distribution Service Plugivery announce that they have joined forces to announce the release of not ONE but SEVEN new inspiring Virtual Instruments.

Based in Germany, AIR Music Technology started as Wizoo Sound Design, one of the earliest pioneers in virtual instrument technology. The AIR team is responsible for the core of much of the effects and instrument offerings in Avid's Pro Tools and Akai Professionals MPC software/OS.

Leveraging this history of excellence, AIR is back in a big way for 2022. The new range of virtual instrument plug-ins results from nearly five years of development drawn from twenty years of experience and creating exciting new soft-synths.

The 7 new plug-ins support VST, VST 3, AU and AXX formats and also operate as standalone desktop software for "Plug and Play" performance with any midi controller.

Note: All these NEW products do not support/require the use of iLok. Instead, AIR has developed a convenient login based system to authorize the following brand new plug-ins :

Bassline - Vacuum Evolved

AIR Music Launches 7 New Virtual Instruments

Mittwoch, 06. April 2022 07:00

The Bassline is a monophonic vintage synthesizer featuring Vacuum Tube Synthesis with an evolved version of AIR's vacuum tube circuit modelling technology made first famous by AIR VACCUM. VACCUM if you are not familiar with it, is considered by many the reference Synth for Avid's Protools.

Electric - Your New Reference Electric Piano
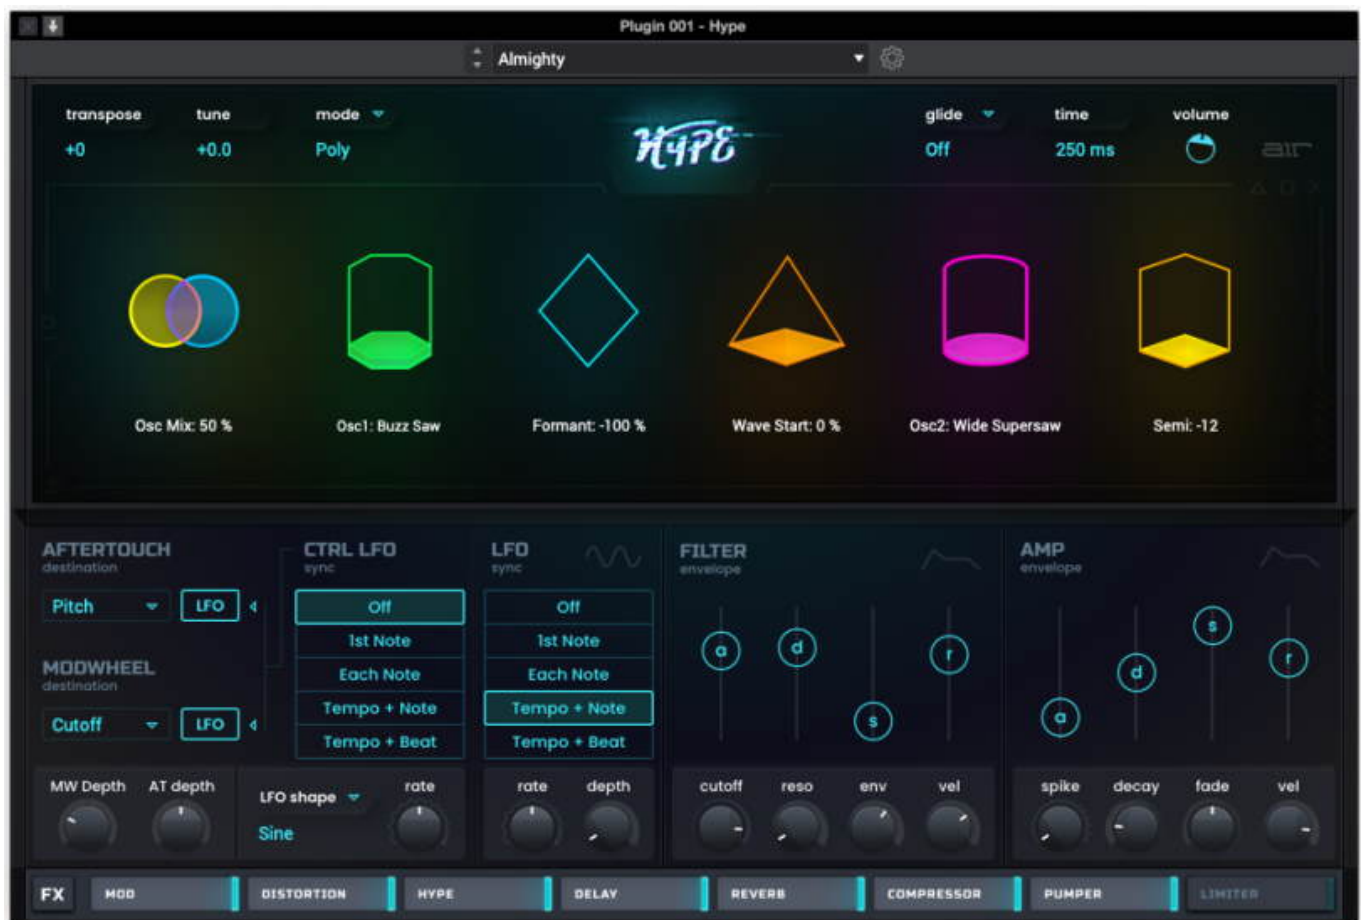

Mittwoch, 06. April 2022 07:00

AIR Electric plugin is your new complete electric piano collection. Choose from a comprehensive array of legendary keyboards like Rhodes, Wurlitzers, FM keyboards, and more developed over decades of research. Electric proudly builds upon the legacy of excellence of AIR Velvet, considered the reference electronic Piano Instrument for Avids Protools with a new range of powerful features and sounds.

HYPE - You Can Believe It

AIR Music Launches 7 New Virtual Instruments

Mittwoch, 06. April 2022 07:00

Hype's name speaks for itself - a revolutionary and exciting Hybrid synthesizer plug-in instrument with features that extend far beyond its massive preset library. Cover everything from hard-hitting plucks to sultry melodic leads with this preset and macro-based synth combining multiple synth engines (wavetable, FM, virtual analogue, multi-sample) all in one easy to use interface.

Mellotron - AIR's Homage to the Original Sampler

AIR Music Launches 7 New Virtual Instruments

Mittwoch, 06. April 2022 07:00

The new Mellotron plug-in instrument is a recreation of the legendary tape sample keyboard machine featured on countless classic Rock albums. It's so Iconic many consider it to be the first sampler. With AIR's over 20 years of experience in developing high-quality emulations, you can be assured this instrument won't disappoint.

Odyssey (by WayOutWare) - Take a Journey Into Sound

Creators of the Legendary timeWARP2600 and Kick Axe instruments, WayOutWare prides its self on creating the highest quality emulations. In fact, TimeWARP was the only ARP 2600 emulation product endorsed by its creator, Alan R. Pearlman.

Not only is it accurate sonically, but with their experienced circuit modelling and signal processing, WayOutWare captured the behaviour, character and charm of the original ARP Odyssey. With Expression pedal modulation, velocity and channel pressure support built-in every attention to detail and realism has been made.

Solina - Strings Evolved

AIR Music Launches 7 New Virtual Instruments

Mittwoch, 06. April 2022 07:00

The AIR Solina Plugin is based on the Iconic classic 6-timbre polyphonic keyboard instrument featuring Contrabass, Cello, Viola, Violin, Trumpet and Horn selections with independent volume, pan and pitch control. Combine them for a massive sonic experience to liven up even the most thrilling music production.

TubeSynth - The Next Generation of Poly-Synthesis

TubeSynth leverages the next generation of advanced analogue modelling technology first debuted in our highly acclaimed desktop plugin synth Vacuum Pro. Our evolved engine is the result of over 20 years of meticulous research and development. You will discover new lush soundscapes you never before dreamt possible. Dive deep into subtractive synthesis to recreate those sought-after analogue sounds from the 70s and 80s.
