

IK Multimedia TONEX Plug

IK Multimedia announces TONEX Plug, the ultimate portable guitar and bass headphone amp, offering instant access to over 40,000 free amps and pedal rigs, plus Premium and Signature Collections. Powered by IK's award-winning AI Machine Modeling, TONEX Plug delivers the same studio-quality tone as the TONEX Pedal and TONEX ONE in a sleek, pocket-sized design.

With built-in Bluetooth and the included TONEX Control app (iOS/Android), users can practice or play anywhere, stream audio, and browse and edit presets with the app, then load them wirelessly to TONEX Plug.

TONEX Plug Overview:

- Personal headphone amp with AI Machine Modeling for guitar and bass
- Over 40,000 FREE Tone Models on ToneNET, plus Premium and Signature Collections
- Fully compatible with the growing TONEX Ecosystem
- Stores 30 user presets across 10 color-coded banks
- Find, load, and edit presets wirelessly via TONEX Control App (iOS/Android)
- Stream stereo audio via Bluetooth from all popular apps
- Also functions as a high-quality USB-C audio interface
- Onboard EQ, gate, compressor, delay, modulation, and reverb
- Built-in chromatic tuner with LED indicator
- 1/4" swivel jack and 1/8" stereo headphone output
- Rechargeable battery with up to 6 hours of playtime
- Includes TONEX SE and AmpliTube 5 SE software for capturing, recording, and playing

From the first note, players will experience incredibly rich, dynamic, and touch-sensitive tones from an ultra-compact device. TONEX Plug, through its control app, also provides unlimited access to ToneNET, the world's most popular tone-sharing platform. Users can expand their personal library of sounds to suit any style or

session at a moment's notice. Whether it's a beloved vintage amp or models of their own rig, users can load any Tone Model wirelessly and transport themselves to the front of the stage as every nuance of the original rig comes to life. The TONEX Plug is ideal for silent rehearsal and travel.

With TONEX Plug, users can explore their tone library in complete silence using headphones, stream backing tracks via Bluetooth, jam with YouTube lessons or music-learning apps, all while playing their guitar or bass through high-quality amps and effects. Additionally, a built-in tuner and metronome eliminate the need for extra gear, allowing players to focus on improving their skills or warming up for gigs.

The TONEX Plug isn't limited to just factory sounds. Through the app, users can instantly connect to ToneNET and explore over 40,000 free Tone Models, as well as Premium and Signature collections. The active ToneNET and Tone Partner community uploads and shares some of the most sought-after amps ever made, all of which are easily searchable by song and artist keywords or by using dedicated filters such as instrument, type, Most Liked, Top 10, and more.

The TONEX Control app for iOS and Android serves as the wireless command center for TONEX Plug, providing real-time control over all parameters. Easily browse and load Tone Models from ToneNET. Edit the amp, cab, EQ, IRs, and TONEX FX with precision, and save changes directly to the hardware. Control transforms the TONEX Plug from a headphone amp into a fully customizable tone workstation that adapts to any workflow.

Whether it's learning new chords or recording professional-level tracks, TONEX Plug

gives users more ways to connect. Stream audio wirelessly from devices via Bluetooth or connect directly to a computer to unlock even more possibilities. With many guitar and bass learning apps offering real-time feedback, the connected TONEX Plug ensures precise note tracking, delivering a studio-quality tone. It's the perfect companion for practicing smarter and sounding better everywhere.

And when inspiration strikes, TONEX Plug also works as a high-quality audio interface. Easily record directly to a desktop setup via USB-C, without the need for extra equipment. The best tones are always just one connection away. TONEX Plug users can easily capture their own rig and take it anywhere with IK's powerful AI Machine Modeling. The included TONEX Modeler profiles a rig's tone in just minutes using real guitar signals - not just test tones - and delivers unprecedented authenticity. Players can take Tone Models of their own rigs on the road, backstage, or wherever they go.

TONEX Plug will ship in November and it can be ordered now from the IK online store and from IK dealers worldwide at the following prices:

- TONEX Plug: Includes TONEX Plug, USB-C cable, TONEX SE and AmpliTube 5 SE software.
- TONEX Plug + Pouch: Includes TONEX Plug, custom carrying pouch, USB-C cable, TONEX SE and AmpliTube 5 SE software.
- TONEX Plug Pouch: Custom carrying pouch for TONEX Plug.
- TONEX Control app (iOS/Android) (free): Provides wireless control over all TONEX Plug parameters and access to ToneNET.
