

Mixed In Key 11 Pro

Mixed In Key, known for its expertise in key detection and harmonic mixing for top DJs and producers worldwide, announces Mixed In Key 11 Pro - a major evolution of its flagship software. Building on the success of Mixed In Key 11, the Pro version debuts groundbreaking features that let DJs discover, test, and refine mashups and DJ mix transitions faster than ever before.

Plus, this version includes all the original functionality of Mixed In Key 11.

What's New in Mixed In Key 11 Pro:

Mashup Player & Instant Suggestions

- Load a track into Deck A and instantly see recommended mashup suggestions for Deck B.
- Everything is beatmatched and harmonically aligned, so your mashups always sound tight.
- Preview any section on the fly - no more waiting through long intros.

DJ Mix Mode

- Get real-time track suggestions that match your current selection.
- Seamlessly plan transitions, build setlists, and prep for gigs without guesswork.

Real-Time Preview

- Jump to any part of a track without sitting through extended intros.
- Quickly test how different sections work together in your mashups.

Save & Favorite Your Best Ideas

- Keep your top mashups in “Favorite Mashups” or add them to custom playlists.
- Export your ideas to a DAW or DJ software to polish them further.

“We designed Mixed In Key 11 Pro to be the ultimate DJ toolkit. You can load tracks, get instant mashup ideas, test transitions, and organize your set in minutes—something your standard DJ software can’t match. This is a game-changer for anyone who loves to mix creatively.” – Yakov, Creator and President of Mixed In Key

Why Mixed In Key 11 Pro?

- **Built on Proven Technology:** An evolution of the same key detection and harmonic mixing engine trusted by top DJs like David Guetta, KSHMR, Kaskade, Lil Jon, Zedd, and Armin van Buuren.
- **Time-Saving Features:** Skip directly to the best parts of your tracks, test transitions in real-time, and quickly identify the most harmonically compatible songs.
- **Enhanced Accuracy:** Industry-leading key detection, energy level analysis, and an intuitive interface for a more precise, efficient workflow.
