Universal Audio UAD Spark Studio

Universal Audio Inc. (UA), a company with expertise in audio production tools, introduces UAD Spark Studio, a music production subscription bringing together LUNA Studio, UA's fully equipped DAW, and a complete native UAD plug-in and virtual instrument library into one creative environment.

Designed to give artists and producers everything they need to turn ideas into hit records, UAD Spark Studio includes an expanding collection of 70 native UAD plug-ins featuring titles from Neve, Ampex, Lexicon, and more, alongside world-class virtual instruments such as Minimoog, PolyMAX, and Electra88. “UAD Spark Studio brings the whole studio together in one place,” said Bill Putnam Jr., CEO of Universal Audio. “LUNA, UAD plug-ins, instruments - it’s all there, so you can spend less time setting things up and more time making music.”

Key Benefits

- UAD Plug-Ins. Get an ever-expanding library of exclusive titles from Neve, Ampex, Lexicon, and more.
- UAD Instruments. Stay inspired with world-class virtual instruments including Minimoog, Polymax, Electra88, and more.
- LUNA Studio. Create music with the world's smartest, best-sounding DAW, now with powerful new smart tools and workflows.
- LUNA Play. Tap into a faster, simpler way to write and record songs - like a

voice memo app designed just for making music, with automatic level setting and UAD plug-in presets built in.
- Works with any audio interface. Get accelerated performance on Apollo and Volt interfaces.

At the center of UAD Spark Studio is LUNA Studio, featuring new smart tools, workflow improvements, and LUNA Play - a faster, simpler way to write and record songs. New smart tools include Stem Separation, Audio-to-MIDI for adding virtual instrument layers, and Lyric Transcription and Chord Extraction powered by Moises.

LUNA 3.0 also adds production and editing features including Piano Roll, Folder Tracks, Chord, Key, and Time Signature Rulers, Adaptive Grid, Clip Gain Automation, Record FX, Strip Silence, Click Track Automation, and support for recording mono sources on stereo tracks.

UAD Spark Studio is available starting September 15, 2026.
