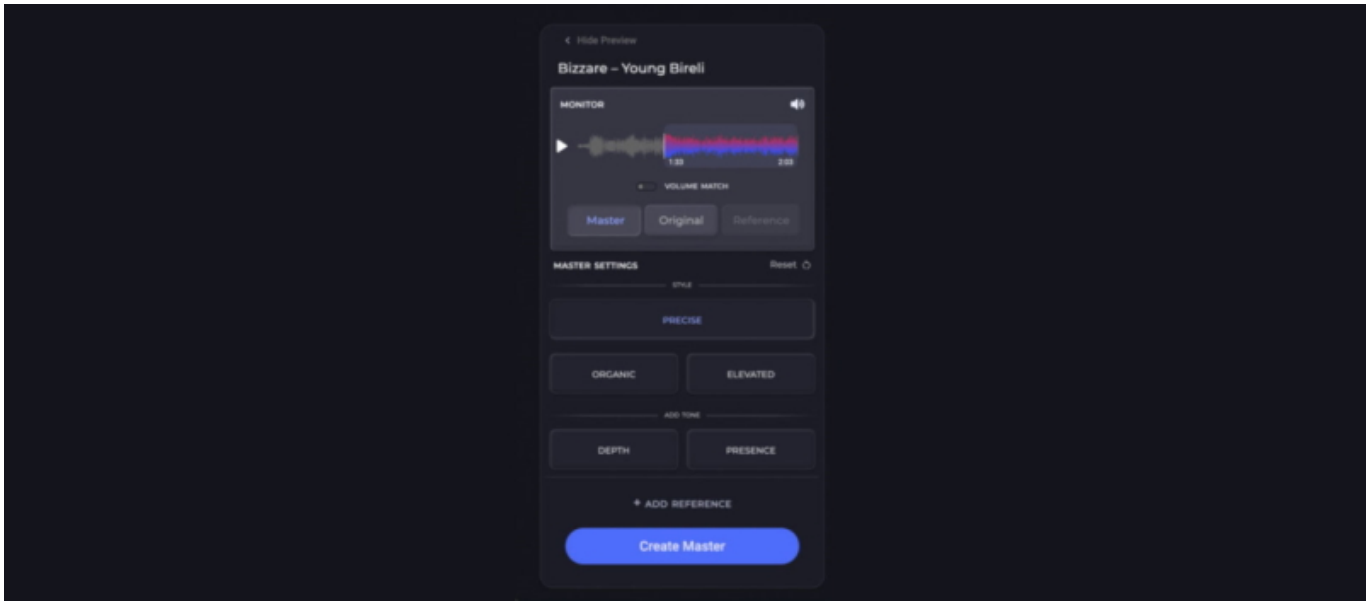
Waves Online Mastering Juli Update 2025



Waves Audio, a company with expertise in professional audio signal processing technologies and plugins, announces an upgrade to its Online Mastering service. This update brings an even higher level of sound quality than before. Building on its already top-tier performance, this new version delivers enhanced clarity, tighter low end, pristine highs, and optimized loudness for digital platforms. Developed in collaboration with multi-Platinum GRAMMY-winning producers and engineers, this latest version makes it easier than ever to achieve release-ready masters in just a few clicks.

Waves' upgraded Online Mastering service delivers pro-quality masters through cutting-edge AI, fine-tuned and shaped by top mastering engineers. Powered by Waves Neural Networks technology and award-winning audio expertise, Waves Online Mastering creates professional masters with outstanding precision, clarity, and tonal balance. Users can easily achieve high-end results and personalize their masters using Style, Tone, and Reference Track options, making Waves Online Mastering ideal for both experienced producers and newcomers.

This latest update brings not only optimized mastering quality, but also reduced pricing. In addition to the updated AI sound engine, Waves has also streamlined the computing process powering its Online Mastering platform, resulting in even more affordable prices for customers.

For EDM Producers: the newly enhanced "Precise" mastering style has been fine-tuned for electronic music. Expect tighter low-end, punchier drops, and crystal-clear highs, perfected in collaboration with GRAMMY winner Dave Audé (Mark Ronson, Bruno Mars, Beyoncé, Lady Gaga), who comments, "The new Waves Online Mastering nails clarity, tightens the low end, and adjusts the level perfectly for DSPs so I don't even have to think about it."

Additional industry-leading producers and engineers who have tested the service have praised its premium audio quality and intuitive, streamlined workflow:

- “I’m thoroughly impressed. From light to aggressive, any track receives a perfect master.” - Tony Maserati (Beyoncé, David Bowie).
- “The sound is so accurate for anything from subtle to ‘pushed’ masters.” - Mark Ralph (Franz Ferdinand, Rudimental).
- “The sound quality and ease of use of this service finally make top-notch mastering accessible to everyone.” - Lu Diaz (DJ Khaled, Pitbull).

Whether you're mixing EDM, hip-hop, folk, rock, or anything in between, this next-gen version adapts to your genre and delivers enhanced clarity, punch and balance, producing polished and professional results that meet today’s industry sonic standards.
